ET Docket No. 92-9

**COMMENTS OF
TELESCIENCES, INC., HARRIS CORPORATION-FARINON DIVISION,
AND DIGITAL MICROWAVE CORPORATION IN RESPONSE TO ALCATEL
NETWORK SYSTEMS, INC. SUPPLEMENTAL COMMENTS**

Telesciences, Inc., Harris Corporation-Farinon Division, and Digital Microwave (collectively "Joint Commenters"), by their undersigned counsel, hereby submit these comments regarding the Supplemental Comments filed by Alcatel Network Systems, Inc.^{1/} The Joint Commenters strongly support the Telecommunications Industry Association ("TIA") comments filed on June 14, 1993 in response to Alcatel Network

and greater bandwidths to restrict the warehousing of spectrum. If the Commission considers any relaxation of the loading requirement, it should be limited to the 10 MHz bandwidth channels. The loading requirement should not be relaxed for the 20 or 30 MHz channels.

Although, the Joint Commenters fully support the 3.5 year transition period for the new spectrum efficiency requirements incorporated in the TIA compromise plan, the Joint Commenters request that the Commission give due consideration to the adoption of a five year transition period, if it finds that a longer transition period is in the public interest.

The Joint Commenters believe that the TIA plan is a reasonable compromise that will serve microwave users, microwave equipment manufacturers and the public interest.

Accordingly, the Joint Commenters urge the Commission to adopt the TIA compromise plan filed in this docket on June 14, 1993.

Respectfully submitted,

TELESCIENCES, INC., HARRIS CORPORATION-FARINON DIVISION, AND
DIGITAL MICROWAVE CORPORATION
